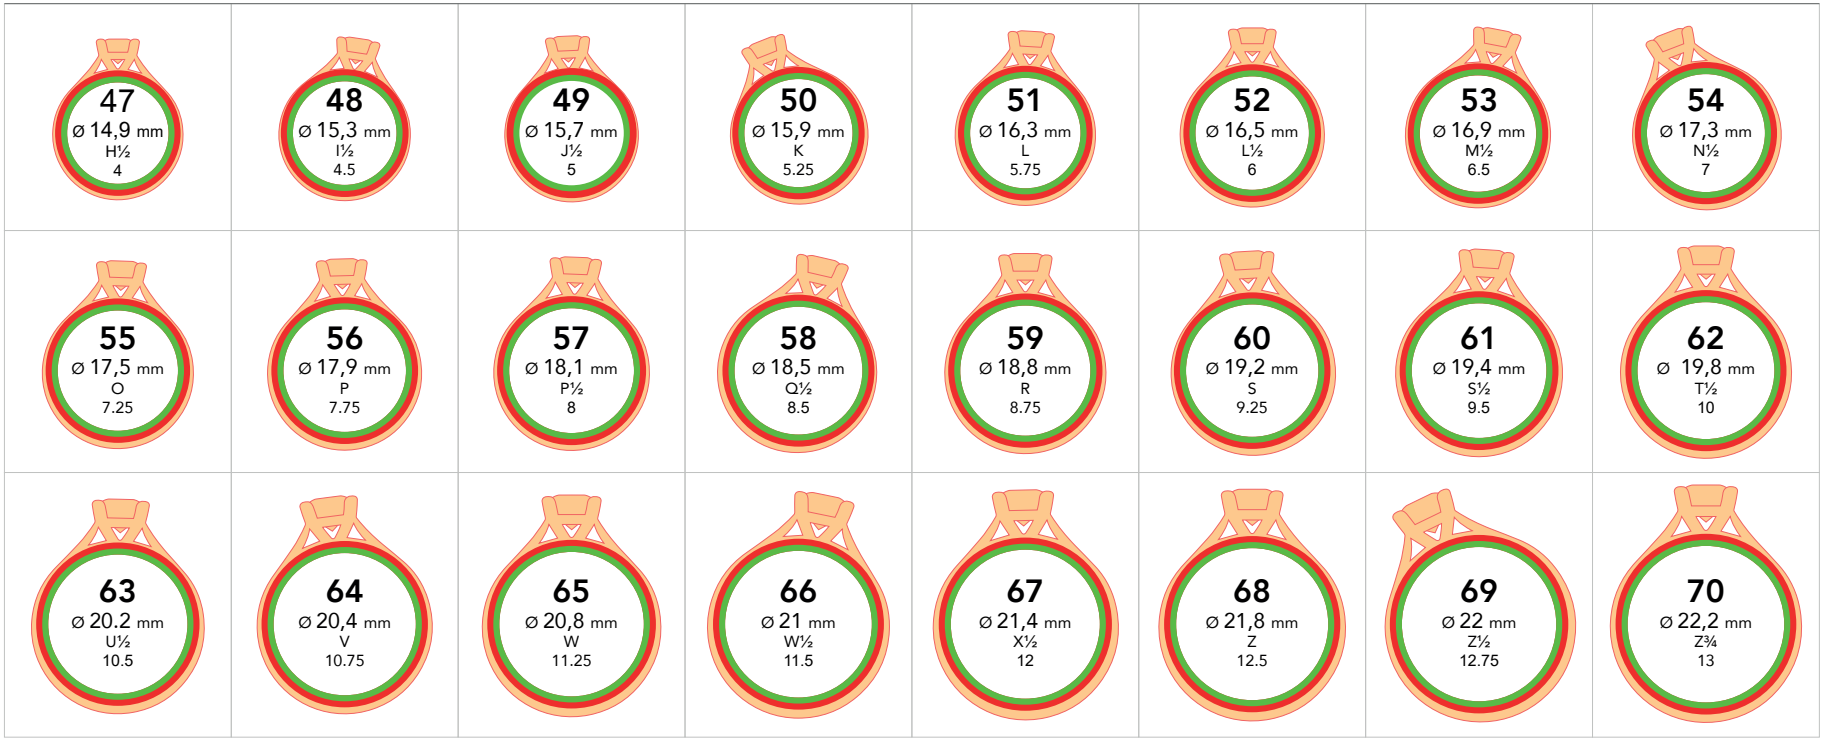
CHANTAL VAULET

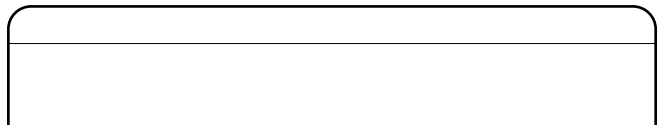
How to measure your ring size

Ensure that your printer is set to 100% for accurate sizing.
To check the printer settings, press Ctrl + P.
After printing, verify the size using a ruler or measuring tape.
(For the size to be correct, 10 cm should measure exactly 10 cm.)

Find your ring size:
If you have a well-fitting ring, place it over the circles on the printout. Make sure the inner circle is clearly visible. The outer circle should not be visible when viewed from above. This indicates the correct size. If you're between sizes, we recommend choosing the larger size.
Alternatively, you can order a set of sizing rings to find your exact ring size.
For assistance, email our Customer Service Department at customerservice@chantalvaulet.com.



Measure the line again to ensure it was printed correctly.



Or use a credit card to check the size:
